

## Stefanie Lavery, Ontario

My Superhero is “Stefanie Sparkle” from Plaqueaxaly. She’s determined to fight plaque with her super powers or should I say her Super Skills. She’s only been a plaque fighting super hero for two years since graduation and has already built up a name for herself in the area. She’s the best plaque and tartar fighter in Stouffville and her Head Quarters is full of all the latest plaque fighting equipment. Her customers are comfortable in the finest chairs along with flat screens for relaxation while she fights the daily build up of plaque and tartar in the city 6 days a week. I vote for “Stefanie Sparkle” as our Champion Super Hero of Stouffville!

As any dental office, we have quite a few anxious patients walk through our doors; Stefanie has spent countless hours with many of them educating them on their oral health and prevention - and they now have better, happier lives after overcoming some of that anxiety and keeping up with treatment! We couldn’t do what we do without her compassion!

Awesome dental experience. super friendly and very knowledge.

Stefanie Lavery, is a colleague but also my hygienist, she is very thorough, gentle and very understanding when it comes to understanding patients fears from previous hygienists.

Finally found a practice where I am comfortable. Stefanie made me feel comfortable as soon as we met. She is very competent, efficient, and knowledgeable. She has changed my mind about dental experiences and I now look forward to seeing her.

She always goes above and beyond to not only do her job but to make you feel that you are her priority when your in her chair. She’s very compassionate and calming in nature that she makes you look forward to sitting in the dreaded dental chair!! She is great and takes her time!

Stefanie is great at getting kids excited about their oral health! They come back with better home care habits and they get super excited to see her! She is changing the next generation!

She cleans my teeth so I dont have to get needles.

Stef is the golden standard for all dental hygienists! She's kind, caring, gentle, thorough, and demonstrates the utmost professionalism. She truly cares about her patients. She's my dental hygienist superhero.

The last time I went to a dentist's office was well over 15 years ago and the reason is that I am scared to death of any dentist or hygienist. Stefanie is a friend of my daughter and they have kept in touch even though they live in separate cities. A few weeks ago, I was eating and part of a filling came out which left me with a sharp tooth. I thought I could get away with leaving it but it started to hurt so I made the big girl choice to visit a dentist near my home just to see what could be done. It turns out that I needed to have the tooth pulled which freaked me out. So at this time I had to make a hard decision on what to do. My daughter was going to visit Stefanie and she knew about my situation and assured me that if I go there, I wouldn't feel a thing. I took the plunge and went, the minute I walked into the office, my heart was beating, I cried because I was scared. I got in the chair, the dentist gave me a needle to numb my mouth, and at that time Stefanie convinces me to get a cleaning. As scared as I was, I reluctantly agreed but she was gentle, talked me through everything, she knew when to stop to give me a rest, she spoke to me to make me feel comfortable all the time feeling no pain. I watched TV while she did the cleaning and my teeth have never felt cleaner. I was thrilled. Now it was time to pull my tooth out, back in the chair, and out it came again feeling no pain. Yes you heard me right, no pain. I felt so comfortable, at ease and extremely happy with the results. I promised to take care of my teeth and told Stefanie I would see her in 6 months for a check up and another cleaning. I have no issue driving 4 hours to see her all because of her kindness and professionalism. Thank you Stouffville Smiles and Stefanie.
